Fan Activity

What you will need:

- **Fan- electric, handheld, or homemade.**
- **If you don't have a fan use a hairdryer.**
- **Paper of any kind- shredded, tissues paper, toilet paper. Ribbons or strings.**

How to make the game

- Take the paper you are using and tear it up, into different size pieces.
- Turn on the fan or hairdryer, starting at a slow speed. If using handheld, just hold it.
- Take a hand full of paper and place in front of the fan or hairdryer (or blow it with the handheld), and it will blow in all different directions.

- Sitting in front of the fan or hairdryer will allow them to experience the wind and the paper flying by at the same time.
- Increase and decrease speed, with more or less paper depending on preferences.

Benefits

- Sensory: this is a great whole-body experience, sitting in front of the air source will allow them to feel the wind all over their body. Feeling the paper flying past or landing on them adds more sensory feeling to the experience.
- Anticipation: turning the fan on and off will all build-up of anticipation, counting down, by tapping the body will allow them to be prepared for the feeling.
- Requesting more: stopping the activity and seeing if they seek more will allow them to request the activity and feel in control
- Building relationships: this activity will allow you to build trust, by listening to what they are or aren't enjoying and reacting to that, and the fun activity will create a perfect environment to connect together will having a good time.
