

Firework Painting

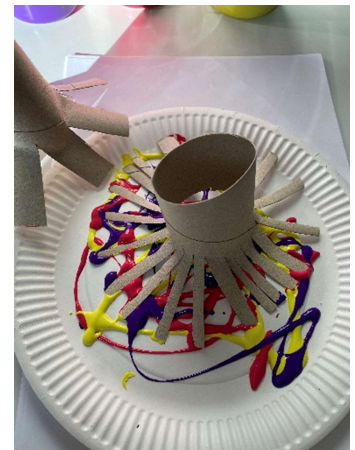

What you will need:

- Paint
- Paper
- Toilet roll tubes
- Scissors
- Paper plate or something to put the paint on.

How to make the game

- Pick your colours of paint, mix them on the paper plate. Cut the toilet tubes in strips, make them thin or thick to make different fireworks.
- Dip into paint and then stamp onto paper, making a lovely firework effect!

Benefits

- Fine motor skills: the holding of the toilet tubes, cut (if can and supervised), dipping and pressing all increase fine motor skills.
- Sensory: use scented paint (can add scents to paint you already have), add glitter, or sand (this is so when it dries it feels bumpy), this allows this activity to explore more than one sense.
